

ALL ABOUT

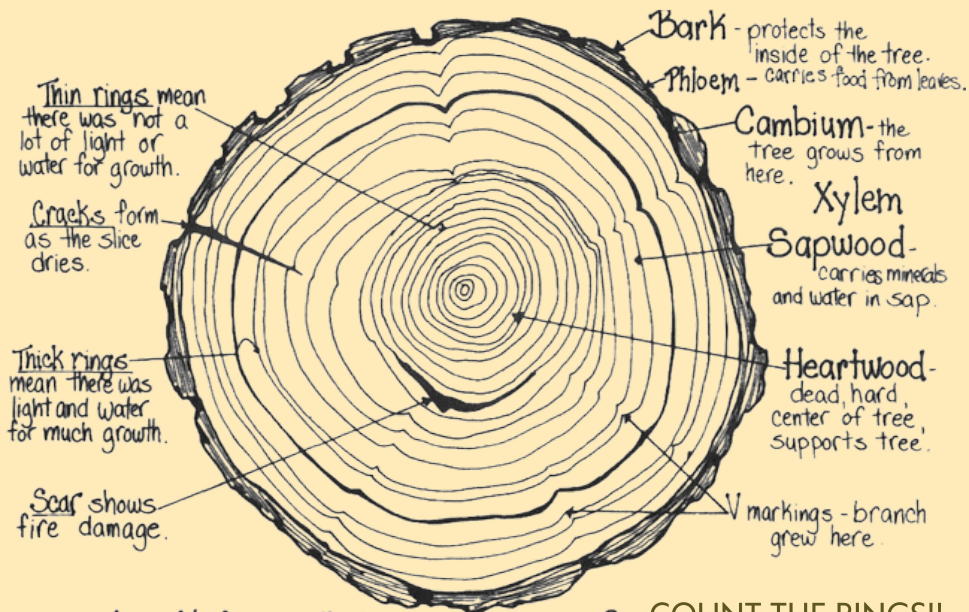

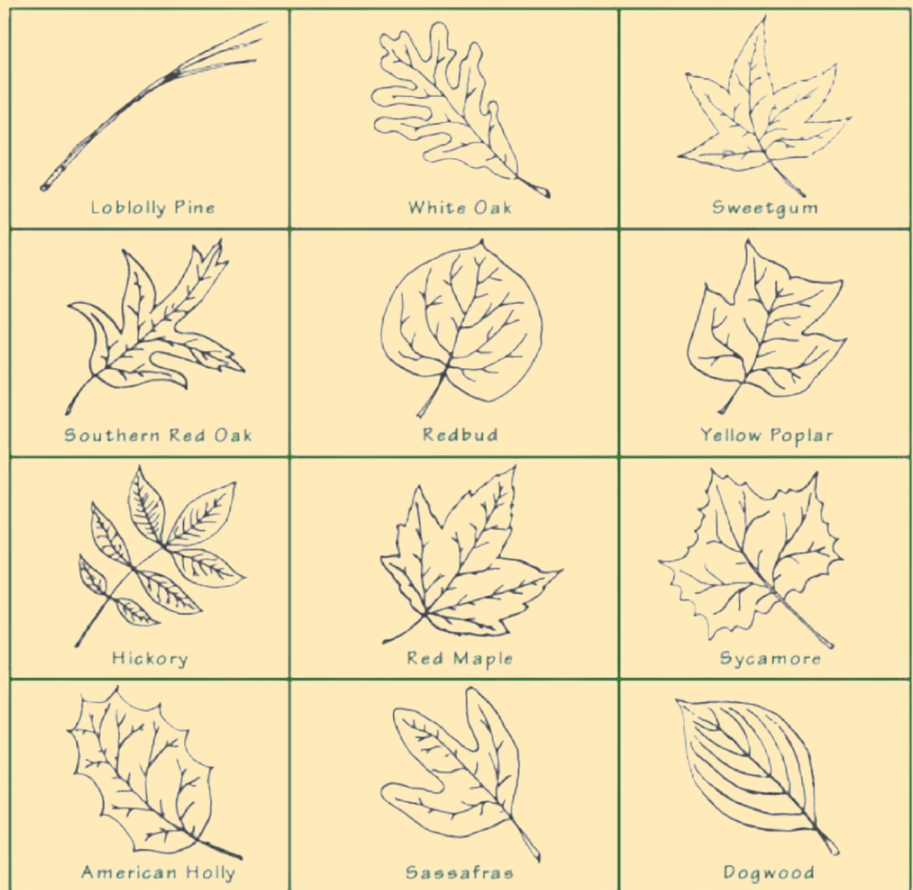

TREES

WHY TREES?

Trees give off oxygen that we need to breathe.

WHAT ELSE?

They clean the air, reduce flooding, provide habitat for wildlife, cool communities, reduce stress in people and block noise

How old do you think this tree was? COUNT THE RINGS!!

TREE FACTS

Tell their age by counting their rings

Never die of old age

Trees grow from the top - so branches will always be at the height where they bud

Trees communicate with each other by emitting chemicals

Connections - Communities - Conservation
